

Ball Valve Manufacturers

A ball valve is a valve with a spherical disc, the part of the valve which controls the flow through it. The sphere has a hole, or port, through the middle so that when the port is in line with both ends of the valve, flow will occur. When the valve is closed, the hole is perpendicular to the ends of the valve, and flow is blocked. The ball valve, along with the butterfly valve and plug valve, are part of the family of quarter turn valves. As a leading **Ball Valve Manufacturers in China**, Yaye Industrial has been producing industrial ball valves to the highest quality standards with ultra-modern manufacturing technology and astute materials sourcing.

BALL VALVE

-  **Standard Size :** 1/2 to 48"
-  **ASME Standard :** ASME B16.34
-  **Temperature :** -20 - 450 °F
-  **Connections:** Flange, Threaded,
Socket Weld

When selecting SS 316 bolts for your project, it's essential to consider factors such as size, thread type, and the specific environmental conditions they will face. They offer high tensile strength and can withstand extreme temperatures. Citizen Metals is a leading manufacturer and exporter of **SS 316 Bolts**, 316L, 316H and 316Ti Fasteners that are being designed as per the national and international standard quality of raw materials and thus making sure of their durability and high quality. We offer an inclusive range of stainless steel valves such as SS 316 Bolts, SS 316L Nuts, SS 316H Screws, SS 316Ti Washers, and SS 316 Stud.
