

Azure Admin + Azure Security

Here's why AZ-104 + AZ-500 matters

The Skill Gap Organizations See

Azure Skills Are in High Demand, Secure Azure Skills Even More

Global cloud roles are growing

15–20% YoY

Azure remains a

top 3 cloud platform worldwide.

But here's the reality

Most cloud breaches come from **misconfigurations**, not exploits.

Organizations want professionals who can **build safely, not just build fast.**

The Skill Gap Organizations See

Admin Alone Is No Longer Enough

Most Azure incidents start with:

- ✔ Misconfigured identities
- ✔ Excessive permissions
- ✔ Poor monitoring
- ✔ Weak security defaults

If you can deploy Azure but can't secure it, it's just half the battle won.

The Winning Combination

AZ-104 + AZ-500 = Real-World Readiness

This combo teaches you:

- ✔ AZ-104 → How Azure works (admin, networking, storage, monitoring)
- ✔ AZ-500 → How Azure fails (identity abuse, network exposure, data risk)

Together, they mirror how Azure is used in real enterprises.

Career Impact & Salary Signals

Why This Combo Pays Off

Roles aligned to this skillset include:

- ✓ Azure Administrator
- ✓ Cloud Security Engineer
- ✓ SOC / Cloud Security Analyst
- ✓ Azure Security Consultant

Typical salary ranges (2025–2026):

Mid-level

\$90K–\$120K (US)

Senior cloud security roles:

\$130K+

Security-aware cloud professionals earn more, consistently.

Who This Path Is For

Designed for Professionals Who Want to Level Up

Ideal if you are:

- ✔ An Azure or system administrator
- ✔ A cloud engineer moving into security
- ✔ An IT professional preparing for AZ-104 or AZ-500
- ✔ Someone who wants long-term cloud relevance

The future cloud role is security-first by default.
