The Open-Source SIEM & XDR Platform Powering Modern SOCs

www.infosectrain.com

What is Wazuh?

Wazuh is a free, open-source SIEM and XDR platform that provides centralized log management, threat detection, and automated response.

Works across:

- Windows & Linux endpoints
- Servers & cloud workloads
- Hybrid and multi-cloud SOCs

Why SOCs Choose Wazuh

Built for modern SOC environments

- Real-time threat detection
- File integrity & malware monitoring
- Vulnerability & compliance visibility
- Cloud & threat intel integrations
- Automated incident response

INFOSECTRAIN
Educate. Excel. Empower.

What Makes Wazuh Powerful

One platform. Multiple security needs.

SIEM + XDR

Endpoint + Cloud visibility

Detection + Compliance + Automation

Why Wazuh Skills Are in Demand

- Open-source SIEM adoption growing across SOCs
- High demand for **SOC Analysts, SIEM & Detection Engineers**
- SOC roles using SIEM/XDR typically offer

₹6–15 LPA (India)

$80k–130k (Global)

Wazuh used by enterprises, MSSPs & cloud-first teams

Who Should Learn Wazuh?

- SOC Analysts
- Detection & SIEM Engineers
- Blue Team & IR Professionals
- Security students & freshers
- Anyone moving into SOC operations

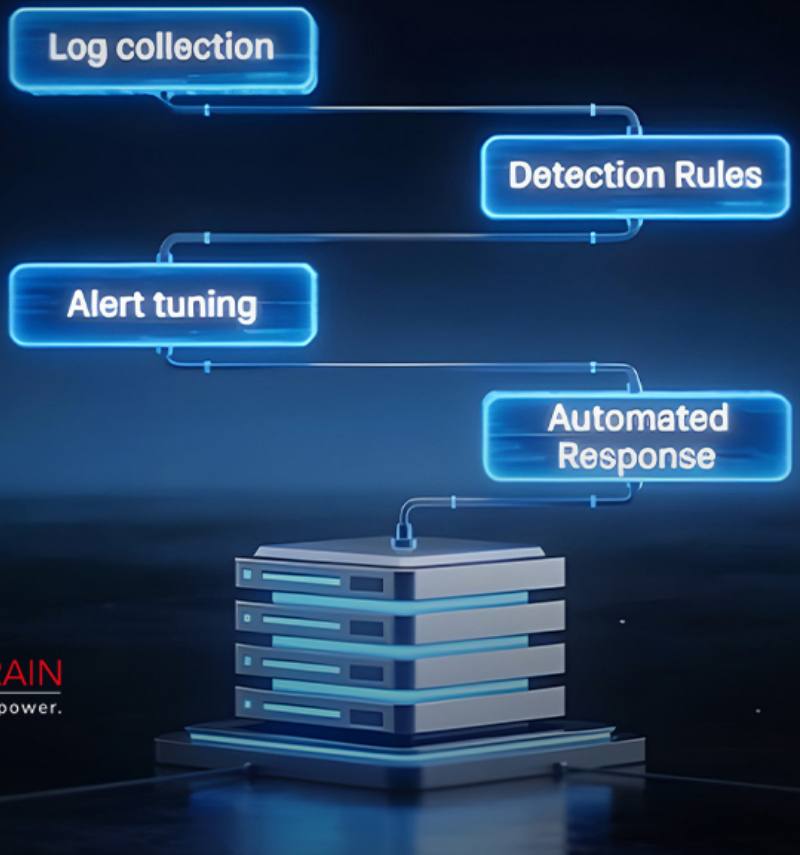
Why Wazuh Training at InfosecTrain

Enterprise-focused. Practical. SOC-driven

- Hands-on SIEM & XDR SOC training
- Live Wazuh environment with attack simulations
- Windows & Linux endpoint telemetry analysis
- Detection engineering, alert tuning & automation
- SOC dashboards for triage & investigations



INFOSECTRAIN
Educate. Excel. Empower.

Built for real-world SOC environments.
Hands-on training, not just theory.

Next batch begins **28th March**
